

# Supplement to IEEE Standard for Software Verification and Validation: Content Map to IEEE/EIA 12207.1-1997

Sponsor

**Software Engineering Standards Committee  
of the  
IEEE Computer Society**

Approved 16 September 1998

**IEEE-SA Standards Board**

**Abstract:** The relationship between the two sets of requirements on plans for verification and validation of software, found in IEEE Std 1012-1998 and IEEE/EIA 12207.1-1997, is explained so that users may produce documents that comply with both standards.

**Keywords:** life cycle data plans, qualification test, verification and validation

**IEEE Standards** documents are developed within the IEEE Societies and the Standards Coordinating Committees of the IEEE Standards Association (IEEE-SA) Standards Board. Members of the committees serve voluntarily and without compensation. They are not necessarily members of the Institute. The standards developed within IEEE represent a consensus of the broad expertise on the subject within the Institute as well as those activities outside of IEEE that have expressed an interest in participating in the development of the standard.

Use of an IEEE Standard is wholly voluntary. The existence of an IEEE Standard does not imply that there are no other ways to produce, test, measure, purchase, market, or provide other goods and services related to the scope of the IEEE Standard. Furthermore, the viewpoint expressed at the time a standard is approved and issued is subject to change brought about through developments in the state of the art and comments received from users of the standard. Every IEEE Standard is subjected to review at least every five years for revision or reaffirmation. When a document is more than five years old and has not been reaffirmed, it is reasonable to conclude that its contents, although still of some value, do not wholly reflect the present state of the art. Users are cautioned to check to determine that they have the latest edition of any IEEE Standard.

Comments for revision of IEEE Standards are welcome from any interested party, regardless of membership affiliation with IEEE. Suggestions for changes in documents should be in the form of a proposed change of text, together with appropriate supporting comments.

Interpretations: Occasionally questions may arise regarding the meaning of portions of standards as they relate to specific applications. When the need for interpretations is brought to the attention of IEEE, the Institute will initiate action to prepare appropriate responses. Since IEEE Standards represent a consensus of all concerned interests, it is important to ensure that any interpretation has also received the concurrence of a balance of interests. For this reason, IEEE and the members of its societies and Standards Coordinating Committees are not able to provide an instant response to interpretation requests except in those cases where the matter has previously received formal consideration.

Comments on standards and requests for interpretations should be addressed to:

Secretary, IEEE-SA Standards Board

Authorization to photocopy portions of any individual standard for internal or personal use is granted by the Institute of Electrical and Electronics Engineers, Inc., provided that the appropriate fee is paid to Copyright Clearance Center. To arrange for payment of licensing fee, please contact Copyright Clearance Center, Customer Service, 222 Rosewood Drive, Danvers, MA 01923 USA; (978) 750-8400. Permission to photocopy portions of any individual standard for educational classroom use can also be obtained through the Copyright Clearance Center.

## Introduction

(This introduction is not part of IEEE Std 1012a-1998, Supplement to IEEE Standard for Software Verification and Validation: Content Map to IEEE/EIA 12207.1-1997.)

This standard is designed to act as a supplement to IEEE Std 1012-1998, IEEE Standard for Software Verification and Validation. The readers of this document should use IEEE Std 1012a-1998 in conjunction with IEEE Std 1012-1998.

## Participants

This supplement was prepared by the Life Cycle Data Harmonization Working Group of the Software Engineering Standards Committee of the IEEE Computer Society. At the time this supplement was approved, the working group consisted of the following members:

### **Leonard L. Tripp, *Chair***

Edward Byrne  
Paul R. Croll  
Perry DeWeese  
Robin Fralick  
Marilyn Ginsberg-Finner  
John Harauz  
Mark Henley

Dennis Lawrence  
David Maibor  
Ray Milovanovic  
James Moore  
Timothy Niesen  
Dennis Rilling

Terry Rout  
Richard Schmidt  
Norman Schneidewind  
David Schultz  
Basil Sherlund  
Peter Voldner  
Ronald Wade

The following persons were on the balloting committee:

|                         |                     |                          |
|-------------------------|---------------------|--------------------------|
| Mikhail Auguston        | Julio Gonzalez-Sanz | Warren L. Persons        |
| Dennis Beauchaine       | L. M. Gunther       | John G. Phippen          |
| Leo Beltracchi          | David A. Gustafson  | Alex Polack              |
| Mordechai Ben-Menachem  | John Harauz         | Peter T. Poon            |
| H. Ronald Berlack       | Herbert Hecht       | Kenneth R. Ptack         |
| Richard E. Biehl        | Manfred Hein        | I. C. Pyle               |
| William J. Boll         | Gordon Henley       | Annette D. Reilly        |
| Juris Borzovs           | Mark Henley         | Christian Reiser         |
| Edward R. Byrne         | John W. Horch       | Dennis Rilling           |
| James E. Cardow         | Jerry Huller        | Helmut Sandmayr          |
| Keith Chan              | Peter L. Hung       | Uma D. Satyen            |
| John J. Chilenski       | George Jackelen     | Stephen R. Schach        |
| Antonio M. Cicu         | Lisa A. Jensen      | Hans Schaefer            |
| Theo Clarke             | Leon Jordan         | Norman Schneidewind      |
| Sylvain Clermont        | Vladan V. Jovanovic | David J. Schultz         |
| Francois Coallier       | William S. Junk     | Gregory D. Schumacher    |
| Rosemary Coleman        | George X. Kambic    | Carl S. Seddio           |
| Darrell Cooksey         | Myron S. Karasik    | Robert W. Shillato       |
| W. W. Geoff Cozens      | Ron S. Kenett       | David M. Siefert         |
| Paul R. Croll           | Robert J. Kierzyk   | Carl A. Singer           |
| Gregory T. Daich        | Shaye Koenig        | James M. Sivak           |
| M. A. Daniels           | Thomas M. Kurihara  | Alfred R. Sorkowitz      |
| Taz Daughtrey           | John B. Lane        | Donald W. Sova           |
| Bostjan K. Derganc      | J. Dennis Lawrence  | Julia Stesney            |
| Perry R. DeWeese        | Fang Ching Lim      | Norma Stopyra            |
| Harpal Dhama            | V. J. Maggioli      | Fred J. Strauss          |
| Sherman Eagles          | David Maibor        | Robert N. Sulgrove       |
| Robert G. Ebenau        | Kartik C. Majumdar  | John Swearingen          |
| Leo Egan                | Henry A. Malec      | Booker Thomas            |
| Richard L. Evans        | John R. Matras      | Gina To                  |
| William Eventoff        | Tomoo Matsubara     | Patricia Trellue         |
| Jonathan H. Fairclough  | Mike McAndrew       | T. H. Tse                |
| John W. Fendrich        | Sue McGrath         | Theodore J. Urbanowicz   |
| Julian Forster          | Jerome W. Mersky    | Glenn D. Venable         |
| Kirby Fortenberry       | Bret Michael        | Udo Voges                |
| Eva Freund              | Alan Miller         | Dolores Wallace          |
| Roger U. Fujii          | Lance Miller        | Camille S. White-Partain |
| Simon Gabrihelidis      | Lisa Ming           | Scott A. Whitmire        |
| Barry L. Garner         | Celia H. Modell     | P. A. Wolfgang           |
| Adel N. Ghannam         | Pavol Navrat        | Paul R. Work             |
| Hiranmay Ghosh          | Myma L. Olson       | Kathryn P. Yglesias      |
| Marilyn Ginsberg-Finner | Mike Ottewill       | Natalie C. Yopconka      |
| Eugene A. Glasser       | Indradeb P. Pal     | Weider D. Yu             |
| John Garth Glynn        | Lalit M. Patnaik    | Geraldine Zimmerman      |

When the IEEE-SA Standards Board approved this supplement on 16 September 1998, it had the following membership:

**Richard J. Holleman**, *Chair*

**Donald N. Heirman**, *Vice Chair*

**Judith Gorman**, *Secretary*

Satish K. Aggarwal  
Clyde R. Camp  
James T. Carlo

# **Supplement to IEEE Standard for Software Verification and Validation: Content Map to IEEE/EIA 12207.1-1997**

## **Annex J**

(informative)

### **Guidelines for compliance with IEEE/EIA 12207.1-1997**

#### **J.1 Overview**

The Software Engineering Standards Committee (SESC) of the IEEE Computer Society has endorsed the policy of adopting international standards. In 1995, the international standard, ISO/IEC 12207, Information technology—Software life cycle processes, was completed. The standard establishes a common framework for software life cycle processes, with well-defined terminology, that can be referenced by the software industry.

In 1995 the SESC evaluated ISO/IEC 12207 and decided that the standard should be adopted and serve as the basis for life cycle processes within the IEEE Software Engineering Collection. The IEEE adaptation of ISO/IEC 12207 is IEEE/EIA 12207.0-1996. It contains ISO/IEC 12207 and the following additions: improved compliance approach, life cycle process objectives, life cycle data objectives, and errata.

The implementation of ISO/IEC 12207 within the IEEE also includes the following:

- IEEE/EIA 12207.1-1997, IEEE/EIA Guide for Information Technology—Software life cycle processes—Life cycle data;
- IEEE/EIA 12207.2-1997, IEEE/EIA Guide for Information Technology—Software life cycle processes—Implementation considerations; and
- Additions to 11 SESC standards (i.e., IEEE Std 730, 828, 829, 830, 1012, 1016, 1058, 1062, 1219, 1233, 1362) to define the correlation between the data produced by existing SESC standards and the data produced by the application of IEEE/EIA 12207.1-1997.

NOTE—Although IEEE/EIA 12207.1-1997 is a guide, it also contains provisions for application as a standard with specific compliance requirements. This supplement treats IEEE/EIA 12207.1-1997 as a standard.

In order to achieve compliance with both IEEE Std 1012-1998<sup>1</sup> and IEEE/EIA 12207.1-1997, it is essential that the user review and satisfy the data requirements for both standards.

When IEEE Std 1012-1998 is directly referenced, the precedence for conformance is based upon this standard alone. When IEEE Std 1012-1998 is referenced with the IEEE/EIA 12207 standard series, the precedence for conformance is based upon the directly referenced IEEE/EIA 12207 standard, unless there is a statement that this standard has precedence.

### **J.1.1 Scope and purpose**

Both IEEE Std 1012-1998 and IEEE/EIA 12207.1-1997 place requirements on plans for verification of software and validation of software. The purpose of this annex is to explain the relationship between the two sets of requirements so that users producing documents intended to comply with both standards may do so.

## **J.2 Correlation**

This clause explains the relationship between IEEE Std 1012-1998 and IEEE/EIA 12207.0-1996 in the following areas: terminology, process, and life cycle data.

### **J.2.1 Terminology correlation**

The two standards use similar terms in similar ways. Both use the terms test, qualification test, verification, and validation in a similar manner.

### **J.2.2 Process correlation**

Both IEEE Std 1012-1998 and IEEE/EIA 12207.0-1996 use a process-oriented approach for describing the verification process and the validation process. Both documents have the same major processes: acquisition, supply, development, operation, and maintenance. The two, however, differ in the names of the activities of the development process. IEEE Std 1012-1998 uses the following activities:

- Concept;
- Requirements;
- Design;
- Implementation;
- Test;
- Installation and checkout.

IEEE/EIA 12207.0-1996 subdivides the development process into the following activities:

- Process implementation;
- System requirements analysis;
- System architectural design;
- Software requirements analysis;
- Software architectural design;
- Software detailed design;
- Software coding and testing;
- Software integration;

---

<sup>1</sup>For the purpose of this document, it should be assumed that references to IEEE Std 1012-1998 include this supplement, IEEE Std 1012a-1998.

- Software qualification testing;
- System integration;
- System qualification testing;
- Software installation;
- Software acceptance support.

IEEE Std 1012-1998 provides a greater level of detail about what is involved in the verification and validation of software.

### J.2.3 Life cycle data correlation for Software Verification and Validation Plans

The information required in a Software Verification and Validation Plan (or V&V plan) by IEEE Std 1012-1998 and the information required in a verification process plan and validation process plan by IEEE/EIA 12207.1-1997 are similar. It is reasonable to expect that a single document could comply with both standards. Details are provided in J.3.

### J.2.4 Life cycle data correlation between other data in IEEE/EIA 12207.1-1997 and IEEE Std 1012-1998

Table J.1 correlates the life cycle data other than Software Verification and Validation Plans between IEEE/EIA 12207.1-1997 and IEEE Std 1012-1998. It provides information to users of both standards.

**Table J.1—Life cycle data correlation between other data in IEEE/EIA 12207.1-1997 and IEEE Std 1012-1998**

| Information item             | IEEE/EIA 12207.0-1996 subclause(s) | Kind   | IEEE/EIA 12207.1-1997 subclause | IEEE Std 1012-1998 subclause(s) |
|------------------------------|------------------------------------|--------|---------------------------------|---------------------------------|
| Project management plan      | 5.2.4.3, 5.2.4.4, and 5.2.4.5      | Plan   | 6.11                            | 5.1 and 7                       |
| Software verification report | 6.4                                | Report | 6.23                            | 7.6                             |

### J.3 Document compliance

This clause provides details bearing on a claim that a Software Verification and Validation Plan complying with IEEE Std 1012-1998 would also achieve “document compliance” with the verification plan and the validation plan specified in IEEE/EIA 12207.1-1997. The requirements for document compliance are summarized in two rows of Table 1 of IEEE/EIA 12207.1-1997. Those rows are reproduced in Table J.2. of this supplement.

**Table J.2—Summary of requirements for a Software Verification and Validation Plan excerpted from Table 1 of IEEE/EIA 12207.1-1997**

| Information item  | IEEE/EIA 12207.0-1996 subclause | Kind       | IEEE/EIA 12207.1-1997 subclause | References                                                                            |
|-------------------|---------------------------------|------------|---------------------------------|---------------------------------------------------------------------------------------|
| Verification plan | 6.4.1.5                         | Plan (5.2) | —                               | IEEE Std 1012-1998<br>IEEE Std 1059-1993                                              |
| Validation plan   | 6.5.1.4                         | Plan (5.2) | —                               | IEEE Std 1012-1998<br>IEEE Std 1059-1993<br>ISO/IEC 9126: 1991<br>ISO/IEC 12119: 1994 |

The requirements for document compliance are discussed in the following subclauses:

- J.3.1. discusses compliance with the generic content guideline (the “kind” of document) noted in column 3 of Table J.2 as a “plan.” The generic content guidelines for a “plan” appear in 5.2 of IEEE/EIA 12207.1-1997.
- J.3.2 discusses compliance with the specific content for a verification plan as specified in IEEE/EIA 12207.1-1997.
- J.3.3 discusses compliance with the specific content for a validation plan as specified in IEEE/EIA 12207.1-1997.
- J.3.4 discusses compliance with the life cycle data objectives of Annex H of IEEE/EIA 12207.0-1996 as described in 4.2 of IEEE/EIA 12207.1-1997.

#### J.3.1 Compliance with generic content guidelines of IEEE/EIA 12207.1-1997

The generic content guidelines for a “plan” in IEEE/EIA 12207.1-1997 are prescribed by 5.2 of IEEE/EIA 12207.1-1997. A complying plan shall achieve the purpose stated in 5.2.1 and include the information listed in 5.2.2 of IEEE/EIA 12207.1-1997.

The purpose of a plan is:

IEEE/EIA 12207.1-1997, subclause 5.2.1: Purpose: Define when, how, and by whom specific activities are to be performed, including options and alternatives, as required.

A software verification and validation plan complying with IEEE Std 1012-1998 would achieve the stated purpose.

Any plan complying with IEEE/EIA 12207.1-1997 shall satisfy the generic content requirements provided in 5.2.2 of that standard. Table J.3 of this supplement lists the generic content items and, where appropriate, references the clause of IEEE Std 1012-1998 that requires the same information. The third column of Table J.3 lists information that shall be added in order to comply with the generic content requirements.

**Table J.3—Coverage of generic plan requirements by IEEE Std 1012-1998**

| IEEE/EIA 12207.1-1997<br>generic content                                                   | Corresponding subclauses of<br>IEEE Std 1012-1998 | Additions to requirements of<br>IEEE Std 1012-1998                                                 |
|--------------------------------------------------------------------------------------------|---------------------------------------------------|----------------------------------------------------------------------------------------------------|
| a) Date of issue and status                                                                | 7.1 Purpose                                       | Date of issue and status shall be provided.                                                        |
| b) Scope                                                                                   | 7.1 Purpose                                       | —                                                                                                  |
| c) Issuing organization                                                                    | 7.1 Purpose                                       | Identification of issuing organization shall be provided.                                          |
| d) References                                                                              | 7.2 Referenced documents                          | —                                                                                                  |
| e) Approval authority                                                                      | 7.1 Purpose                                       | Identification of approval authority shall be provided.                                            |
| f) Planned activities and tasks                                                            | 7.5 V&V processes                                 | —                                                                                                  |
| g) Macro references (policies or laws that give rise to the need for this plan)            | 7.2 Referenced documents                          | —                                                                                                  |
| h) Micro references (other plans or task descriptions that elaborate details of this plan) | 7.2 Referenced documents                          | —                                                                                                  |
| i) Schedules                                                                               | 7.4.2 Master schedule                             | —                                                                                                  |
| j) Estimates                                                                               | 7.4.4 Resource summary                            | —                                                                                                  |
| k) Resources and their allocation                                                          | 7.4.4 Resource summary                            | —                                                                                                  |
| l) Responsibilities and authority                                                          | 7.4.5 Responsibilities                            | —                                                                                                  |
| m) Risks                                                                                   | 7.6 V&V reporting requirements                    | —                                                                                                  |
| n) Quality control measures <sup>a</sup>                                                   | 7.7.4 Control procedures                          | —                                                                                                  |
| o) Cost                                                                                    | 7.5 Verification and validation processes         | The costs of verification and validation activities and resources shall be provided or referenced. |
| p) Interfaces among parties involved                                                       | 7.4.1 Organization                                | —                                                                                                  |
| q) Environment / infrastructure (including safety needs)                                   | 7.4.6 Tools, techniques, and methods              | —                                                                                                  |
| r) Training                                                                                | 7.4.6 Tools, techniques, and methods              | —                                                                                                  |
| s) Glossary                                                                                | 7.3 Definitions                                   | —                                                                                                  |
| t) Change procedures and history                                                           | 7.7.4 Control procedures                          | —                                                                                                  |

<sup>a</sup>This includes quality control of the software verification and validation plan itself.

### J.3.2 Compliance with specific verification plan content requirements of IEEE/EIA 12207.1-1997

IEEE/EIA 12207.1-1997 uses the convention that it builds on the content requirements of IEEE/EIA 12207.0-1996 when they exist. Subclause 6.4.1.5 of IEEE/EIA 12207.0-1996 specifies the considerations for software verification plan contents.

Any verification plan complying with IEEE/EIA 12207.1-1997 shall satisfy the specific content requirements provided in 6.4.1.5 of IEEE/EIA 12207.0-1996. Table J.4 of this supplement lists the specific content items and, where appropriate, references the clause of IEEE Std 1012-1998 that requires the same information. The third column of Table J.4 lists information that shall be added in order to comply with the generic content requirements.

**Table J.4—Coverage of specific verification plan requirements by IEEE Std 1012-1998**

| IEEE/EIA 12207.0-1996<br>information requirement                          | Corresponding subclauses<br>of IEEE Std 1012-1998 | Additions to requirements<br>of IEEE Std 1012-1998 <sup>a</sup> |
|---------------------------------------------------------------------------|---------------------------------------------------|-----------------------------------------------------------------|
| Verification tasks and activities for each life cycle activity            | 7.5 Verification and validation processes         | —                                                               |
| Verification tasks and activities for each software product               | 7.5 Verification and validation processes         | —                                                               |
| Resources for verification                                                | 7.4.4 Resource summary                            | —                                                               |
| Responsibilities for verification                                         | 7.4.5 Responsibilities                            | —                                                               |
| Schedule for verification                                                 | 7.4.2 Master schedule                             | —                                                               |
| Procedure for forwarding validation reports to acquirer and other parties | 7.6 V&V reporting requirements                    | —                                                               |

<sup>a</sup>No additional requirements were identified.

### J.3.3 Compliance with specific validation plan content requirements of IEEE/EIA 12207.1-1997

IEEE/EIA 12207.1-1997 uses the convention that it builds on the content requirements of IEEE/EIA 12207.0-1996 when they exist. Subclause 6.5.1.4 of IEEE/EIA 12207.0-1996 specifies the consideration for software validation plan contents.

Any validation plan complying with IEEE/EIA 12207.1-1997 shall satisfy the specific content requirements provided in 6.5.1.4 of IEEE/EIA 12207.0-1996. Table J.5 of this supplement lists the specific content items and, where appropriate, references the clause of IEEE Std 1012-1998 that requires the same information. The third column lists information that shall be added in order to comply with the generic content requirements.

**Table J.5—Coverage of specific validation plan requirements by IEEE Std 1012-1998**

| IEEE/EIA 12207.0-1996 information requirements                            | Corresponding subclauses of IEEE Std 1012-1998 | Additions to requirements of IEEE Std 1012-1998 <sup>a</sup> |
|---------------------------------------------------------------------------|------------------------------------------------|--------------------------------------------------------------|
| Items subject to validation                                               | 7.1 Purpose                                    | —                                                            |
| Validation tasks to be performed                                          | 7.5 Verification and validation processes      | —                                                            |
| Resources for validation                                                  | 7.4.4 Resource summary                         | —                                                            |
| Responsibilities for validation                                           | 7.4.5 Responsibilities                         | —                                                            |
| Schedule for validation                                                   | 7.4.2 Master schedule                          | —                                                            |
| Procedure for forwarding validation reports to acquirer and other parties | 7.6 V&V reporting requirements                 | —                                                            |

<sup>a</sup>No additional requirements were identified.

### J.3.4 Compliance with life cycle data objectives

In addition to the content requirements, life cycle data shall be managed in accordance with the objectives provided in Annex H of IEEE/EIA 12207.0-1996.

NOTE—The information items covered by IEEE Std 1012-1998 include plans and provisions for creating software life cycle data related to the basic types ‘test data’ and ‘management data’ in H.4 of IEEE/EIA 12207.0-1996. It provides for the following: (1) test data, such as test strategy and criteria, cases (what to test), procedures (how to carry out tests), test results, and key decision rationale, and (2) management data such as management plans, status reports, management indicators, criteria and key decision rationale, and contract and other procurement information.

## J.4 Conclusion

The analysis documented in this annex suggests that any verification and validation plan complying with IEEE Std 1012-1998 and the additions specified in Table J.3, Table J.4, and Table J.5, also complies with the requirements of a verification and validation plan in IEEE/EIA 12207.1-1997. In addition, to comply with IEEE/EIA 12207.1-1997, any verification and validation plan shall support the life cycle data objectives of Annex H of IEEE/EIA 12207.0-1996.
